# Missing standard header files in the /usr/include directory.

Published 04/17/2001

## Symptom(s):

```
Missing standard header files in the /usr/include directory.
Missing stdio.h
Error: "cc-1005 cc: ERROR File = filename.c, Line = 1
  The source file "stdio.h" is unavailable.

  #include

                              ^

1 catastrophic error detected in the compilation of "filename.c".
Compilation terminated."
```

## Fact(s):

IRIX 6.5.X
MIPSpro Compilers

## SGI Solution:

Install the subsystem irix_dev.sw.headers from the IRIX 6.5 Development Libraries CD
